GEAUGA COUNTY, OHIO

A resolution providing for the zoning of the unincorporated area of CHESTER TOWNSHIP, Geauga County, Ohio by regulating, in accordance with a comprehensive plan, the location, height, area, number and size of buildings and other structures, percentages of lot area which may be occupied, size of yards, courts and other open spaces, density of population, uses of buildings and other structures and the uses of land; and for such purposes dividing the unincorporated area of the Township into districts and zones of such number, shape and area as are deemed best suited to carry out said purposes, providing a method of administration, and prescribing penalties and proceedings for the administration and enforcement of this Resolution,

WHEREAS, the Board of Trustees of CHESTER TOWNSHIP deems it in the interest of the public health, safety and morals of said Township and its residents to establish a general plan of zoning.

NOW, THEREFORE, BE IT RESOLVED, by the Board of Trustees of Chester Township:

ARTICLE 1 PURPOSE AND GENERAL PROVISIONS

1.00

PURPOSE. This Resolution is adopted to protect and promote the public health, safety and morals. Specifically, the purposes of this Resolution are, among others:

- A. The protection of the community against fire, explosion, air/ground/water pollution, vibration and other hazards to its health, safety, or morals.
- B. The prevention of vehicular traffic congestion on the streets by the appropriate classification of uses for each type of zoning district and the provision for parking and loading/unloading facilities.
- C. To provide sufficient space in appropriate locations for the development of residence, parks, business and industry and those related uses supplying essential services, in accordance with a comprehensive plan, thus promoting the most desirable and appropriate use in order to better stabilize the value of land and buildings and thus protect the tax base of the Township and the public health, safety, morals and welfare of said Township and its residents.
- D. Protect residential areas by limiting the density of population in order to avoid water pollution because of the difficulties in providing adequate sewage disposal and to protect the limited supply of water; by providing for access of light and air to windows and also for privacy; by means of controls over the spacing and relative height of buildings and other structures; by providing for open space on the same lot with development, and through the preservation of open spaces as parks.
- E. The prevention of overcrowding and blight of residential, commercial and industrial areas by regulating the area and height of buildings, yards and other open spaces in order to provide light, air and privacy and thus to protect the public health, safety, morals and welfare.
- F. Secure the most appropriate use of land, to promote stability, to protect the character and established pattern of desirable development in each area, to facilitate adequate but economical provision of public improvements, to conserve the value of buildings and to enhance the value of land; all in accordance with a comprehensive plan.

1.01 **GENERAL PROVISIONS**

1.01.01 **TITLE.** This resolution shall be known as "The Zoning Resolution of Chester Township, Geauga County, Ohio" and may be hereinafter referred to as "this Resolution".

1.01.02 **JURISDICTION.** This Resolution shall apply to all the unincorporated territory of Chester Township, Geauga County, Ohio.

This Resolution shall therefore be regarded as remedial, and shall be liberally construed to further its underlying purposes.

1.01.04 **POWERS NOT CONFERRED BY CHAPTER 519 OF THE OHIO REVISED CODE OR THIS RESOLUTION.**

A. This Resolution does not prohibit the use of any land for agricultural purposes or the construction or use of buildings or structures incident to the use for agricultural purposes of the land on which such buildings or structures are located, including buildings or structures that are used primarily for vinting and selling wine and that are located on land any part of which is used for viticulture and no zoning certificate shall be required for any such building or structure. However, this Resolution shall regulate the use of land for agricultural purposes or the construction or use of buildings or structures incident to the use for agricultural purposes of the land on which such buildings or structures are located in accordance with Ohio Revised Code (O.R.C.) 519.21(B).

B. This Resolution does not apply in respect to the location, erection, construction, reconstruction, change, alteration, maintenance, removal, use, or enlargement of any buildings or structures of any public utility or railroad, whether publicly or privately owned, or the use of land by any public utility or railroad, for the operation of its business. However, subject to R.C. 519.211(B) and Section 11.04 of this Resolution, the provisions of this Resolution shall apply with respect to the location, erection, construction, reconstruction, change, alteration, removal, or enlargement of a wireless telecommunication facility.

C. This Resolution does not prohibit the sale or use of alcoholic beverages in areas where the establishment and operation of any retail business, hotel, lunchroom or restaurant is permitted by this Resolution.

D. This Resolution does not prohibit the use of any land owned or leased by an industrial firm for the conduct of oil or natural gas well drilling or production activities or the location of associated facilities or equipment when such oil or natural gas obtained by the industrial firm is used solely for the operation of its own plants.

- E. This Resolution does not prohibit in a district zoned for agricultural, industrial, residential, or commercial uses, the use of any land for a farm market where fifty percent (50%) or more of the gross income received from the market is derived from produce raised on farms owned or operated by the market operator in a normal crop year.

1.01.05 SCHEDULE OF FEES, CHARGES, AND EXPENSES; AND COLLECTION PROCEDURE.

The Board of Township Trustees shall, by resolution, establish a schedule of fees, charges, and expenses and a collection procedure for zoning certificates, amendments, appeals, conditional zoning certificates, and other matters pertaining to the administration and enforcement of this Resolution requiring investigations, inspections, legal advertising, postage, and other expenses. The schedule of fees shall be posted in the office of the Zoning Inspector and Township Clerk, and may be altered or amended only by resolution of the Board of Township Trustees.

- * Each application for a zoning certificate, amendment, or conditional zoning certificate and notice of appeal shall be accompanied by the fee so established.

Until all applicable fees, charges, and expenses have been paid in full, no action shall be taken on any application or appeal.

1.01.06 FIRST DAY EXCLUDED AND LAST INCLUDED IN COMPUTING TIME; EXCEPTIONS; LEGAL HOLIDAY DEFINED.

The time within which an act is required by law to be done shall be computed by excluding the first and including the last day; except that when the last day falls on Sunday or a legal holiday, then the act may be done on the next succeeding day which is not Sunday or a legal holiday.

When a public office in which an act, required by law, is to be performed is closed to the public for the entire day which constitutes the last day for doing such act or before its usual closing time on such day, then such act may be performed on the next succeeding day which is not a Sunday or legal holiday as defined in O.R.C. 1.14.

"Legal holiday" as used in this section means the days set forth in O.R.C. 1.14.

If any day designated in O.R.C. 1.14 as a legal holiday falls on Sunday, the next succeeding day is a legal holiday.

1.01.07 COMPUTATION OF TIME. If a number of months is to be computed by counting the months from a particular day, the period ends on the same numerical day in the concluding month as the day of the month from which the computation is begun, unless there are not that many days in the concluding month, in which case the period ends on the last day of that month.

- 1.01.08 **SPECIFIC PROVISION PREVAILS OVER GENERAL; EXCEPTION.** If a general provision conflicts with a specific provision, they shall be construed, if possible, so that effect is given to both. If the conflict between the provisions is irreconcilable, the specific provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail.
- 1.01.09 **IRRECONCILABLE AMENDMENTS.** If amendments are enacted at the same or different times, one amendment without reference to another, the amendments are to be harmonized, if possible, so that effect may be given to each. If the amendments are substantively irreconcilable, the latest in date of enactment prevails. The fact that a later amendment restates language deleted by an earlier amendment, or fails to include language inserted by an earlier amendment does not of itself make the amendments irreconcilable. Amendments are irreconcilable only when changes made by each cannot reasonably be put into simultaneous operation.
- 1.01.10 **CONTINUATION OF PRIOR AMENDMENT.** A provision or regulation which is re-enacted or amended is intended to be a continuation of the prior provision or regulation and not a new enactment, so far as it is the same as the prior provision or regulation.
- 1.01.11 **EFFECT OF AMENDMENT.** The amendment of this Resolution does not:
- A. Affect the prior operation of this Resolution or any prior action taken thereunder;
 - B. Affect any validation, cure, right, privilege, obligation, or liability previously acquired, accrued, accorded, or incurred thereunder;
 - C. Affect any violation thereof or penalty, forfeiture, or punishment incurred in respect thereto, prior to the amendment or repeal;
 - D. Affect any investigation, proceeding, or remedy in respect of any such privilege, obligation, liability, penalty, forfeiture, or punishment; and the investigation, proceeding, or remedy may be instituted, continued, or enforced, and the penalty, forfeiture, or punishment imposed, as if the Resolution had not been amended.
- 1.01.12 **ANNEXED TERRITORY.** Upon annexation of Township territory to an existing municipal corporation the zoning regulations then in effect shall remain in full force and shall be enforced by the Township Officials until the legislative authority of said municipal corporation shall either officially adopt the existing zoning regulations or new regulations for such territory.
- 1.01.13 **SEVERABILITY.** If any provisions or regulations of this Resolution or an amendment thereof or the application thereof to any person or circumstance is held invalid, the invalidity does not affect other provisions, regulations, applications, or amendments of this Resolution which can be given effect without the invalid provision, regulation, application or amendment; and to this end the provisions, regulations, and amendments are severable.
- 1.01.14 **EFFECTIVE DATE.** This Resolution shall be in full force and effect from and after its passage as provided by law.

No transmission lines intended for burial across public streets shall be covered until the installed line is inspected by the Township Road Superintendent. When required by the Township Road Superintendent, the applicant shall increase or decrease the depth of transmission lines. The applicant shall coordinate the laying of transmission lines with all public utilities servicing the Township.

Section 8:4

During drilling and production of oil and gas wells, the applicant shall comply with the following regulations:

(A) During the drilling phase, all flowback and waste shall be accumulated in containers and no hydrocarbons, waste, water or other such elements shall be permitted to enter the atmosphere at the well site. Upon fracturing of any well, the applicant shall contain flowback entirely within an adequately vented enclosed system.

(G) All storage tanks, separators, and distribution pipes shall be surrounded by a minimum of one-inch clay seal on the surface of the ground and shall be contained by a retainer wall with a minimum one-inch clay seal capable of holding two times the capacity of all storage tanks. The applicant shall provide a loading area to the storage tanks with provisions for a ramp so that if any spillage occurs while removing any materials from storage tanks that any spill will go into a sump which can be pumped into a brine removal vehicle. The sump area shall be constructed by excavating a hole that shall be lined with clay and sufficient in size to contain a 55 gallon metal drum that shall be placed in the hole and said drum shall be weighted down with rocks, metal, or other materials in order to keep said drum submerged. Whenever the brine removal vehicle is at the loading area, all fluids in said sump shall be pumped into the brine removal vehicle. Applicant shall not permit the fluids in the sump to overflow at any time. Such areas shall be developed in accordance with Diagram "A", which is attached hereto and made a part hereof and the area of the pit shall be equal to or greater than two times the capacity of all storage tanks at the site.

(H) The maximum sound level of all operations for the exploration, drilling or extraction of oil, natural gas and other hydrocarbons shall be 65 decibels at a distance of 350 feet, to be exceeded no more than 10% of the time during drilling and exploration only. Annular disposal wells shall be prohibited within the Township and annular disposal of any waste or brine from an oil and gas well shall not be permitted within the Township. All such wastes and brines shall be stored in tanks and removed from the Township by haulers who shall be in compliance with any County, State, and Federal laws requiring registration, licensing or other regulations. When requested by Township officials, said hauler shall produce receipts for the location where such wastes or brine are injected.

Section 8:5

(A) During drilling of a well, the applicant shall install a blowout preventer with a remote manual preventer control, to shut down the system. All rotary rigs used in the drilling process must be equipped with a blowout preventer in good working condition of sufficient size and working pressure rating to control normal hydrostatic pressure for the deepest pool to be penetrated. Such blowout preventer must be installed on the surface casing prior to drilling below the surface casing. The applicant shall also install a gas detector meter to the drilling apparatus to determine if a gas pocket has been hit during drilling. The applicant or his agents shall insure that knowledgeable and experienced drillers shall be on site during all phases of drilling.

(B) The applicant, during production of a well, shall make daily fluid level checks of all oil, gas, brine, waste and other elements removed from any well and shall also check on a daily basis the condition of all equipment to ensure that all equipment required to be secured or locked is so secured. Any joint or connection under pressure and above ground which carries fluids or gases under pressure shall be inspected weekly to ensure no leakage. The applicant shall provide a monthly report to the Zoning Inspector of fluid levels indicated herein, the condition of all equipment, the pressure level of all equipment, leaks, if any, and advise the Zoning Inspector of efforts taken to avoid build-up of paraffin on any equipment or apparatus contained at a well site. The Zoning Inspector shall prepare an inspection form to be filled out monthly by the applicant and filed by the 5th of each month.

(C) After conclusion of the drilling stage, and upon the date when notice is required to be given to the Township of the commencement of production, the applicant shall remove all drilling equipment, temporary tanks and other materials not intended to be permanently placed at the well site.

(D) All disturbed areas are to be fine-graded, seeded, and mulched upon completion of drilling operations. Between November 1 and March 1, fine mulch only. Temporary mulch is to be removed in areas dressed, seeded and mulched after March 1. Weather permitting, all grading required herein shall be completed within 14 days after completion of drilling and all landscaping required herein shall be completed within 60 days after completion of drilling. In no event shall grading and landscaping required in this paragraph be completed in excess of 150 days after completion of drilling.

(E) All storage tanks, apparatus and other equipment located above ground at a well site shall be removed and abandonment completed within 180 days after a well stops producing and the ground shall be restored, to the extent possible, to its original condition prior to drilling of said well, within said 180 day period.

(F) The Township may, at any time, test the nearest water well, spring, and downstream surface water at locations selected by the Township to insure that no groundwater or surface water is being contaminated as a result of any oil and gas well operation. In the event that said testing determines that such contamination has occurred, the Zoning Inspector shall order the applicant to cease production until the source of contamination is located and the applicant is able to eliminate the source of contamination to the satisfaction of the Zoning Inspector.

The owner shall before beginning drilling operations test the water in every water well located within a radius of one-quarter mile from the location of the proposed oil and gas well location in order to obtain a base line quality of the water, unless the owner of the water well objects.

Section 8:6

(A) In the event an applicant at any time determines to cap a producing well, the applicant shall notify the Zoning Inspector. The applicant shall advise the Zoning Inspector of the length of time said well shall be capped and shall further notify the Zoning Inspector ten (10) days prior to when the well will again be made productive.

(B) The applicant shall not permit any hydrocarbons or brines to enter the Sharon or Berea Sandstone formations during drilling or production of any oil and gas well. In the event that such contamination of either sandstone shall occur, the applicant shall immediately notify the Zoning Inspector.

(C) During the drilling stage, no other improvement or additional use shall be placed on the drilling unit. Following initiation of production, such additional improvements and uses as may conform to the Zoning Resolution may be initiated on the drilling unit subject to the restrictions of all other applicable laws and regulations of the Township, County and State of Ohio. Unless other regulations require a greater distance, no new structure shall be located within 750 feet of any well site area within the drilling unit or any land outside of the drilling unit contiguous thereto and owned by applicant. No new subdivisions shall be developed to place a well site area in any common area nor be developed in such a manner that any well site would cause unreasonable sights, smells, odors, sounds, attractions to minors, or other detriments to the health and safety of the residents and natural resources contained within the Township. No structures or common areas are permitted to be developed in an area that may be unreasonably exposed to dangers associated with production, transmission or abandonment of oil and gas wells. The well site area shall be defined to include the oil and gas well, any storage or separation tanks, compressor station, or pit or containment areas for the storage of brine and other wastes.

(D) Applicant shall be prohibited from accumulating combustible materials in the well site area and upon order of the Township Zoning Inspector or Fire Inspector, shall remove any combustible materials that in the opinion of such Township official may be hazardous. Permanent no smoking signs shall be posted in the entrance gate, on the oil storage tanks and temporary signs shall be posted at the drilling site until production commences. No person shall smoke any cigarette, cigar, pipe or other form of tobacco or have any matches, open flames, or burn any other combustible material at the well site during drilling or when handling or removing gas at the well site. The applicant shall insure that when any welding occurs on the premises that suitable welding screens are utilized to protect any person from injury.

(E) All artificial lighting used during drilling or production of any gas and oil well shall be designed, constructed and located in such a manner to prevent emission upon any property not within the drilling unit.

(F) The applicant and any contractor shall be prohibited from increasing the porosity and permeability of the subsurface by the use of explosives.

(G) No person shall refine or otherwise process for extraction the products of a gas and oil well except when necessary to make gas acceptable to flow through gas transmission lines and in the event that the latter becomes necessary, the applicant shall notify the Zoning Inspector prior to commencement of such processing or production. Any burner unit installed in an oil storage tank shall be properly vented and attended to ensure no excess heating within the tank while in use.

(H) If during drilling, the site will be unattended at any time, the applicant shall cap the assembled sections of the well to avoid any hazard or leakage of hydrocarbons or wastes or other elements.

(I) All pipe and related fittings must be equal to or better than the American Petroleum Institute Code 5-L, Grade B, and consist of prime material with standard coating. Upon completion of construction of all tanks and other apparatus to remain on the well site and laying of pipelines, the applicant shall return all disturbed public or private roads, driveways, walks, or approaches to their original condition before disturbance to the satisfaction of the Township Road Superintendent. Applicant shall backfill to existing grade level in such a manner so as to prevent erosion or siltation and shall complete all of the same within 14 days after completion of the installation of storage tanks and other apparatus and pipelines.

(J) A hydrostatic test of all pipeline from the well to the separator and from the separator to transmission lines shall be performed by the applicant prior to placing said line or any section thereof into operation. The test shall consist of a pressure not less than two times the expected maximum operating pressure and shall be recorded over a minimum period of 48 hours. In the event that any drop of pressure is noted within said 48 hour period, the line shall not be made operational

until the line is capable of performing as set forth in this paragraph.

Section 8:7

(A) All gas produced from wells shall be transported from the drill site by means of underground pipeline connected directly with the producing well to the separator or treating facilities by a completely closed system without venting high pressure gas or the products of gas to the atmosphere at the production site. All oil produced from the wells on the well site may be transported from storage tanks by means of underground pipelines or by tank trucks whose holding capacity shall not exceed 100 barrels.

(B) All waste substances such as drilling muds, brine or acids produced or used in connection with drilling operations or production shall be retained in water-tight receptors from which they shall be hauled from the premises for disposal outside of Chester Township within ten days after the completion of drilling and no production shall commence until such removal has occurred.

(C) Truck routes in and out of the well site shall be approved by the Township Road Superintendent. The Superintendent shall require that truck routes through Township roads be limited to roads that can accept the load limits and shall consider routes that will minimize wear on public streets within the Township and which would prevent hazards and damage to other properties in the Township. When a vehicle exceeds load limits on Township roads, the driver shall post any bond which may be required and which is at the time of passage of this resolution \$10,000.00.

(D) The applicant shall be responsible for maintaining the public roads in a debris-free condition at all times and it shall be the responsibility of the applicant to cause the public roads to be free of all debris, mud and other materials that accumulate as a result of drilling, production, transmission, hauling or abandonment proceedings.

(E) The applicant shall provide one off-street parking space for each employee engaged in the drilling process and shall provide at least two permanent off-street parking spaces at the site where production equipment will be located. All trucks, machinery, drilling rigs and other equipment temporarily stored at the site shall be kept within a temporary fenced-in area around the well site when not in use.

Section 8:8

Applicant shall at all times maintain, repair, repaint and replace any storage tank on the drilling unit and shall adequately maintain, repair and replace all fences required under the Zoning Resolution. In the event that the applicant fails to maintain, repair or replace any fence, tank dike, or other structure or apparatus contained on the drilling unit for the purpose of oil and gas well drilling, production or transmission, the same shall be a violation of this Zoning Resolution and the Zoning

Inspector may order the applicant to shut down and cap any producing well or seek any remedies otherwise provided in this Zoning Resolution. (See Sections 3.01.07 and 3.01.08.)

8:9

- A. In the event an oversized or overweight vehicle is used or is to enter the Township and exceeds the classifications set for load limits on streets and roads within the Township, the applicant and vehicle owner, if different than applicant, shall obtain a special permit for overweight vehicles and enter into an agreement to pay for road repairs in accordance with the terms and conditions set forth in the special permit and agreement as more fully set forth in Exhibits B and attached hereto and made a part hereof as if fully rewritten herein, unless the Board of Trustees deems it necessary to provide additional regulations.
- B. In the event that the Zoning Inspector determines that site preparation, drilling operations, or fracturing operations become hazardous, or may cause damage to surrounding properties due to either adverse weather conditions, geologic conditions, or other conditions which become known to said officials, and said drilling or fracturing will adversely affect the health and safety of the residents of the Township, the applicant shall cease drilling or fracturing operations upon oral or written notice from such officials and shall not commence further operations until said hazard or adverse effect on health and safety can be eliminated.

be obsolete or substandard, the right to maintain and operate such nonconforming use shall terminate immediately.

- D. In determining the cost of repair or replacement of any building or structure, the Zoning Inspector shall not consider the cost of the land or any items other than the building or structure itself.
- E. The repair of such obsolete or substandard building shall be completed within one (1) year of the date of the actual damage and destruction, or of the date such building or structure is lawfully determined to be obsolete or substandard.

10.04 EXTENSION. The Board of Zoning Appeals may permit, after public hearing, the extension of the floor area or the land area of a nonconforming use or of a nonconforming building but not of any other nonconforming structure.

Before granting such permission the Board shall find that:

- A. Such extended nonconforming use will not be more harmful or objectionable to the surrounding area, nor impair the orderly development of the Township, and
- B. The extension conforms to the area, yard and height regulations of the district in which it is located, and
- C. The applicable off-street parking and the use of off-street loading requirements are complied with for the entire use and not only the extended portion.

10.05 REPAIRS AND STRUCTURAL ALTERATIONS. Nothing in this Article shall be deemed to prevent normal maintenance and repair of a building or other structure containing a nonconforming use, or of a nonconforming building or structure.

Structural alterations may be made to a nonconforming building or structure or to a structure containing a nonconforming use as follows:

- A. When required by law.
- B. Pursuant to the provisions of Section 10.04.
- C. To convert to a conforming use.
- D. A building or other structure containing residential nonconforming uses may be so altered as to improve interior livability.

However, no structural alterations shall be made in excess of the area, height or yard regulations of the district in which such building is located.

10.06 COMPLETION OF A NONCONFORMING BUILDING OR STRUCTURE. When at the time of passage of this Resolution, construction has begun on a nonconforming building or structure, such building or structure may be completed and used as contemplated at the time construction commenced, provided such construction is completed within one (1) year after the effective date of this Resolution.

ARTICLE 11
WIRELESS TELECOMMUNICATIONS FACILITIES

11.00 PURPOSE.

11.00.01 The purpose of this Article of the Chester Township Zoning Resolution is to regulate wireless communication facilities in order to promote public health, safety and morals and in accordance with a comprehensive plan. Accordingly, the regulations and conditions set forth herein are warranted and necessary, inter alia, to:

- A. Protect residential districts and land uses from potential adverse impacts of wireless telecommunication facilities;
- B. Accommodate the directives of the federal Telecommunications Act of 1996, Public Law, 104-104, to enhance telecommunication services and competition, and particularly wireless telecommunication services;
- C. Promote collocation of wireless telecommunication antennae as an alternative to siting new telecommunication towers and appurtenances and to maximize the use of existing and approved towers and buildings to collocate new wireless telecommunication antenna(s);
- D. Consider the public health and safety issues surrounding wireless telecommunication towers and appurtenances; and.
- E. Protect adjacent properties from potential damage from wireless telecommunication tower failure through careful siting of such structures.

11.00.02 This Resolution shall not unreasonably discriminate among providers of functionally equivalent services nor shall it prohibit or have the effect of prohibiting the provision of personal wireless services. Any requests for authorization to place, construct, or modify personal wireless service facilities shall be acted upon within a reasonable period of time after the request has been duly filed with the Zoning Inspector. Any decision to deny a request to place, construct, or modify wireless telecommunication facilities shall be in writing and supported by substantial evidence contained in a written record. This Resolution shall not regulate the placement, construction, and modification of wireless telecommunication facilities on the basis of the environmental effects of radio frequency emissions to the extent that such facilities comply with the Federal Communications Commission's (FCC) regulations concerning such emissions.

11.01 LOCATION.

11.01.01 **PROHIBITED.** Subject to Section 11.04, wireless telecommunication facilities in locations not specifically listed in this Article shall not be permitted, nor shall any zoning certificate be issued therefor.

11.01.02

PERMITTED USES. A wireless telecommunication facility may be located in the following areas, under the following circumstances and requirements of this Article 11 and upon application for a zoning certificate and issuance of such certificate from the Zoning Inspector.

- A. The erection, construction or replacement of a wireless telecommunication antenna(s) on a lawfully existing tower and with the necessary equipment building may be a permitted use as a collocation on such existing wireless telecommunication tower and facility.
- B. A wireless telecommunication tower facility may be located in the Restricted Industrial District (I District).
- C. A wireless telecommunication tower facility may be located on designated property, other than park land, owned or controlled by the Board of Township Trustees or the Geauga County Board of Commissioners on the effective date of this Article, June 14, 1997.
- D. A wireless telecommunication tower facility may be located within a recorded electric high tension power line easement. A tower located within such an easement shall not be subject to the standards set forth in Section 11.02, B, G, L and Y.

11.01.03

CONDITIONAL USES. A wireless telecommunication facility may be located on park land owned or controlled by the Board of Township Trustees, the Geauga County Board of Commissioners, or the Geauga County Park District, or on property owned by a public school district, provided such park land or school district property is owned or controlled by such governmental entities on the effective date of this Resolution, but such facility may only be permitted as a conditional use upon approval of the Board of Zoning Appeals and provided the applicant demonstrates compliance with the following standards:

- A. There is no technically suitable space for the applicant's antenna(s) and related facilities reasonably available on an existing tower or structure within the geographic area to be served, including the areas set forth in Section 11.01.02. With the zoning certificate application, the applicant shall list the location of every tower, building or structure and all of the areas set forth in Section 11.01.02 that could support the proposed antenna(s) so as to allow it to serve its intended function. The applicant must demonstrate that a technically suitable location is not reasonably available on an existing tower, building or structure or a technically suitable location is not available in any area set forth in Section 11.01.02. If another tower, building or structure, or an area set forth in Section 11.02.02 is technically suitable, the applicant must show that it has requested to collocate on the existing tower and the collocation was rejected by the owner of the tower, building or structure or that it has requested all property owners with technically suitable locations within a two (2)-mile radius to permit it to locate a tower facility in all technically suitable area(s) set forth in Section 11.01.02 under reasonable terms and that each request was rejected. In all circumstances, owners of existing towers shall promptly respond to requests for collocation, but in no event shall they respond more than thirty (30) days from the receipt of a written request for collocation. If another telecommunication tower is technically suitable, the applicant must further show that it has offered to allow the

owner of that other tower to collocate an antenna(s) on another tower within the Township, if such a tower exists and space is available on the tower for collocation, which is owned or controlled by the applicant on reasonably reciprocal terms and the offer was not accepted. In all cases, the Township shall use its best efforts to encourage collocation; and

- B. As a condition of issuing a conditional zoning certificate to construct and operate a tower in the Township, the owner/operator of the telecommunication tower is required to allow collocation until said tower has reached full antenna capacity, but in no event fewer than two (2) additional antenna platforms of equal loading capacity to the owner's/operator's antenna platform for two (2) additional providers unrelated to the owner/operator. Agreement to this provision must be included in the applicant's lease with the landowner, if different from the owner/operator of the tower. Written documentation must be presented to the Zoning Inspector evidencing that the landowner of the property on which the tower is to be located has agreed to the terms of this Subsection as well as all other applicable requirements, regulations and standards set forth in Article 11.
- C. The minimum setback from the nearest lot line to the base of the telecommunication tower shall be one hundred ten percent (110%) of the height of the tower.

11.02

GENERAL REGULATIONS. The regulations and conditions set forth in this Resolution shall apply with respect to the location, erection, construction, reconstruction change, alteration, removal, or enlargement of a telecommunication tower and all appurtenances thereto. Except as otherwise provided in this Article, all wireless telecommunication tower facilities shall comply with the following standards:

- A. All towers shall be of a monopole design, as opposed to a lattice design. Lattice towers existing on the effective date of this provision, however, may be rebuilt as lattice towers of the same height and volume for the purpose of increasing the structural loading capacity of the tower in order to provide for collocation of additional antennas.
- B. Only one (1) wireless telecommunication tower shall be located on a lot.
- C. No telecommunication facility shall be located within a designated one hundred (100) year flood plain as depicted on the maps published by the Federal Emergency Management Agency for Geauga County.
- D. No telecommunication facility shall be located within a wetland as defined by federal law.
- E. A telecommunication facility shall not be mounted on a building or structure listed on the National Register of Historic Places.

- F. A report shall be prepared and submitted by a qualified and licensed professional engineer and shall provide proof of compliance with all applicable federal, state, and county regulations. The report shall include a detailed site plan as required by Section 3.01.02 of this Resolution; a detailed description of the telecommunication tower, antenna(s), equipment building, and appurtenances as well as the tower's structural loading capacity to support at least three (3) antenna platforms of equal loading capacity; and shall verify that radio frequency (electromagnetic) emissions are within compliance with the regulations of the Federal Communications Commission (FCC).
- G. For applications for wireless telecommunication towers and related facilities, as opposed to applications for collocation of antennas and related equipment building(s), the applicant shall demonstrate that the proposed site is the most appropriate location for a telecommunication tower, equipment building, and appurtenances. The applicant shall submit a study by a qualified and licensed professional engineer comparing all potential host sites for the proposed facility to the subject site. The study shall include a description of such sites and a discussion of the ability or inability of the alternative sites to host a facility. Reasons for excluding an alternative site from consideration may include, but are not limited to, the following:
1. Written documentation of the property owner's refusal to locate a telecommunication facility on the site.
 2. Topographic limitations on the site.
 3. Adjacent impediments that would obstruct transmission.
 4. The physical constraints on the site that would preclude construction.
 5. Other technical limitations including a violation of federal, state, or county regulations.
- H. The shared use (i.e. collocation) of pre-existing telecommunications towers and antenna facilities shall be preferred to the construction of new towers and antenna facilities. For applications for wireless telecommunication towers and related facilities, as opposed to applications for collocation of antennas and related equipment building(s), the applicant shall submit a report by a qualified and licensed professional engineer inventorying existing telecommunication facility sites within a two (2)-mile radius of the proposed site outlining the reasons each existing site may or may not be used as an alternative for collocation. The applicant shall demonstrate that collocation is not feasible for the following reasons:
1. Written documentation of the owner's refusal to allow co-location on the existing tower;

2. The proposed equipment would exceed the structural capacity of existing and approved towers and facilities, considering the existing and currently planned uses for those facilities, and the existing or approved tower cannot be reinforced, modified, or replaced to accommodate currently planned or equivalent equipment at a reasonable cost;
 3. The proposed equipment would cause interference materially impacting the usability of other existing or currently planned equipment at the tower or building as documented by a qualified and licensed professional engineer and the interference cannot be prevented at reasonable cost;
 4. Existing or approved towers and buildings cannot accommodate the planned equipment at a height necessary to function reasonably as documented by a qualified and licensed professional engineer;
 5. The location of existing towers or buildings are not technically suitable; and/or
 6. Collocation would violate federal, state, or county regulations.
- I. The applicant shall submit a plan documenting how the telecommunication facility will be maintained on the site in an ongoing manner that meets industry standards.
- J. Except as required by law, an antenna or a tower shall not be illuminated and lighting fixtures or signs shall not be attached to the antenna or tower. If lighting is required by Federal Aviation Administration (FAA) regulations, white strobe lights shall not be permitted at night unless no other alternative is permitted by the FAA.
- K. A security fence not less than eight (8) feet in height shall fully enclose the base of the telecommunication facility including anchors for guy wires. Gates shall be locked at all times.
- L. A landscaped buffer area of not less than fifteen (15) feet in depth shall be placed between the security fence surrounding the wireless communication facilities and the public rights-of-way and any adjacent properties from which a direct view can be had of the facilities, other than the tower itself. The fifteen (15)-foot landscaped buffer shall have a tight screen fence of hardy evergreen shrubbery not less than six (6) feet in height. The landscaping shall be continuously maintained and promptly restored, if necessary.
- M. No advertising sign(s) shall be permitted anywhere on a telecommunication tower, equipment building, and appurtenances or on the site.

- N. A permanent warning sign with a minimum size of two (2) square feet and a maximum size of six (6) square feet shall be posted on the site as well as the emergency telephone number of the owner/operator of each platform. The owner/operator shall also provide the Chester Township fire department, the Chester Township police, and the county emergency management agency with information on who to contact, an address, and a telephone number in the event of an emergency.
- O. There shall be no outdoor storage of equipment or other items on the site except during the facility construction period and to supply emergency power to the facility only during a power outage.
- P. The access driveway to the wireless telecommunication facility shall, whenever feasible, be provided along with the circulation driveways of the existing use on the lot, if any. Where use of an existing driveway is not feasible, the driveway to the site shall be a minimum of fifteen (15) feet in width with a minimum overhead clearance of eleven (11) feet and shall be setback a minimum of twenty (20) feet from the nearest side or rear lot line. This driveway shall meet the load limitations for fire equipment. A turnaround shall be provided for emergency vehicles at the site. A bypass, adequate for emergency vehicles, with an approachable access shall be provided for each one thousand five hundred (1,500) feet of driveway. There shall be a minimum of one (1) parking space.
- Q. A telecommunication tower shall be painted a neutral color to minimize its visibility unless otherwise required by the Federal Communications Commission (FCC) or the Federal Aviation Administration (FAA).
- R. The minimum distance between a telecommunication tower and structures located off the lot the tower is located on shall be one hundred ten percent (110%) of the height of the tower.
- S. If at any time the use of the telecommunication facility is discontinued for one hundred eighty (180) consecutive days, said facility shall be deemed abandoned. The Zoning Inspector shall notify the applicant in writing and advise that the facility must be reactivated within sixty (60) days or it must be dismantled and removed from the site and the site restored to a condition reasonably similar to the condition at the time of the issuance of the zoning certificate. This shall be done at the cost of the owner/operator. The owner/operator of the telecommunication facility shall, on no less than an annual basis from the date of issuance of the zoning certificate, file a declaration with the Zoning Inspector as to the continuing operation of every facility which is subject to Article 11.
- T. The owner/operator of a wireless telecommunication tower shall notify the Township fire department by certified mail of the location and height of the proposed tower as a condition of issuance of a zoning certificate.

- U. After issuance of a zoning certificate to construct a wireless telecommunication facility, the applicant shall commence construction within one hundred eighty (180) days and shall complete construction within one (1) year or the zoning certificate shall expire.
- V. The height of a free-standing telecommunication tower, antenna, and appurtenances shall be less than two hundred (200) feet.
- W. The maximum cumulative total size of all equipment buildings accessory to a telecommunication tower or antenna on a lot shall be six hundred (600) square feet and its maximum height shall be fifteen (15) feet from building grade. Only one (1) equipment building, or the configuration of more than one (1) building to appear that there is one (1) building, shall be permitted on a lot.
- X. A telecommunication tower, shall be setback a minimum of one hundred ten percent (110%) of the height of the tower to a dwelling.
- Y. There shall be no tower erected between a public road and the principal building on a lot which is nearest to the public right-of-way.
- Z. A telecommunication tower, antenna, equipment building, and appurtenances shall comply with all of the regulations for the zoning district in which it is located, except as may otherwise be specified in Article 11 of this Resolution.

11.03

FEES.

- A. Application Fee. The fees for application for zoning certificates as required by this Section shall be as specified by the Board of Township Trustees. See Schedule of Fees, Charges, and Expenses; and Collection Procedure, Section 1.01.05.
- B. Reimbursement of Expenses. The applicant for a wireless communication tower and/or antenna facility shall be responsible for all expenses incurred by the Township for any technical and/or engineering services deemed necessary by the Zoning Inspector, the Board of Zoning Appeals, or the Board of Township Trustees to perform the reviews and/or inspections set forth in this Article which are not covered by the application fee established by the Board of Township Trustees.

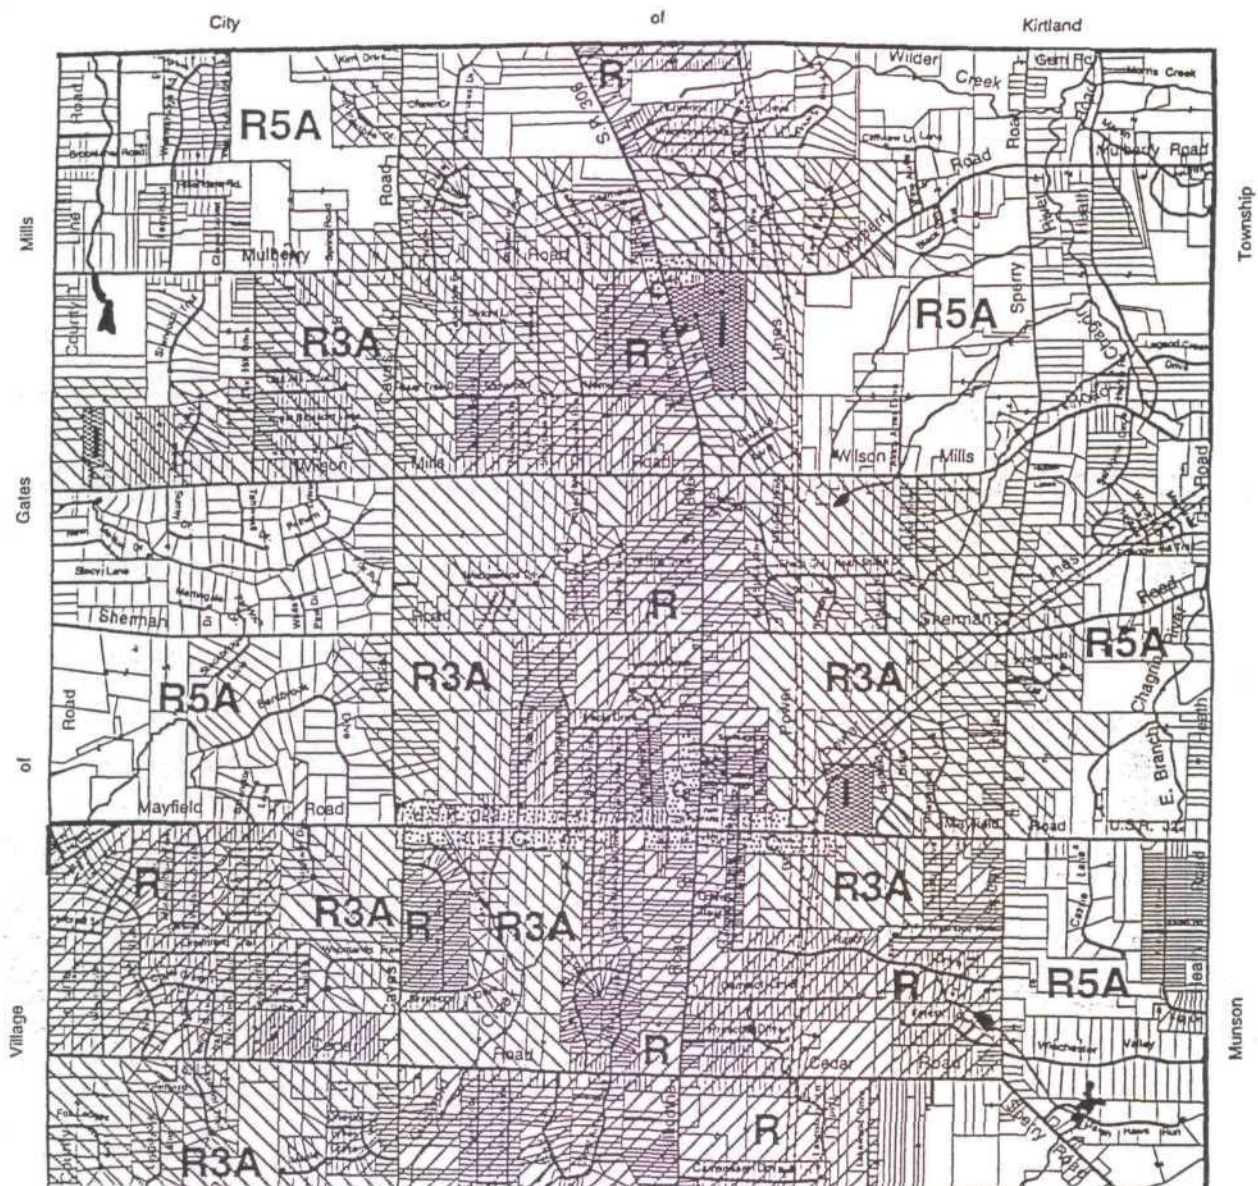

11.04

PUBLIC UTILITY EXEMPTION.

- A. In the event a wireless telecommunications tower facility is to be owned or principally used by a public utility engaged in the provision of telecommunication services, the regulations of this Article 11 do not apply when the proposed location of the tower facility is in an area of the Township which is not residentially zoned. The proponent of such tower facility must file a written application with the Zoning Inspector supported in writing by substantial evidence that the tower will be owned or principally used by a public utility engaged in the provision of telecommunication services. The applicant must also demonstrate by substantial evidence that it possesses a sufficient degree of the following attributes associated with being a public utility to be considered a "public utility" for purposes of this exemption:

1. Whether the applicant devotes an essential good or service to the general public which has a legal right to demand or receive this good or service;
 2. Whether the applicant provides its good or service to the public indiscriminately and reasonably;
 3. Whether the applicant has an obligation to provide the good or service which cannot be arbitrarily or unreasonably withdrawn;
 4. Whether the applicant conducts its operations in such a manner as to be a matter of public concern;
 5. Whether the good or service is vital;
 6. Whether there is a lack of competition in the local marketplace for the good or service;
 7. Whether there is regulation by a government authority and the extent of that regulation;
 8. Whether the applicant possesses the power of eminent domain.
- B. No single factor set forth above is controlling as to whether the applicant is a "public utility engaged in the provision of telecommunications services". Each factor should be considered and weighed according to the factual circumstances presented and, in specific circumstances, some factors may be given more weight than others.
- C. If the Zoning Inspector determines to deny the applicant such "public utility" status, the Inspector shall do so in writing, and state the reasons therefor. Such decision of denial by the Zoning Inspector shall not be a final decision by the Township on this issue. Any determination by the Zoning Inspector that the applicant is not a public utility engaged in the provision of telecommunications services shall be appealable to the Board of Zoning Appeals pursuant to the procedures set forth in this Zoning Resolution. The decision of the Board of Zoning Appeals shall be the final decision of the Township on this issue.
- D. In the event a wireless telecommunications tower facility is proposed to be located in an unincorporated area of the Township, in an area zoned for residential use, and is to be owned or principally used by a public utility engaged in the provision of telecommunications services, the public utility shall be exempt from the requirements of this Zoning Resolution if it meets all of the criteria in 1, 2, and 3 below, as follows:
1. All of the requirements of Subsection 11.04 A through C are met;

2. The public utility provides both of the following by certified mail:
 - a. Written notice to each owner of property, as shown on the County Auditor's current tax list, whose land is contiguous to or directly across a street or roadway from the property on which the tower is proposed to be constructed, stating all of the following in clear and concise language:
 - (1) The public utility's intent to construct the tower; and
 - (2) A description of the property sufficient to identify the proposed location; and
 - (3) That no later than fifteen (15) days after the date of mailing of the notice, any such property owner may give written notice to the Board of Township Trustees requesting that the provisions of this Zoning Resolution apply to the proposed location of the tower. If the notice to a property owner is returned unclaimed or refused, the person shall mail the notice by regular mail. The failure of delivery of the notice does not invalidate the notice; and
 - b. Written notice to the Board of Township Trustees of the information specified in Subsection B.2.a. of this Section; and
3. If the Board of Township Trustees receives notice from a property owner under Subsection D.2.a.(3) of this Section within the time specified in that Subsection, or if a Trustee makes an objection to the proposed location of the telecommunications tower within fifteen (15) days after the date of mailing of the notice sent under Subsection D.2.b. of this Section, the Board of Trustees shall request that the Clerk of the Township send the person proposing to construct the tower written notice that the tower is subject to the regulations of this Zoning Resolution. The notice shall be sent no later than five (5) days after the earlier of the date the Board of Trustees first receives such a notice from a property owner or the date upon which a Trustee makes an objection. Upon the date of mailing of the notice to the person, the provisions of this Zoning Resolution shall apply to the tower without exception. If the Board of Township Trustees, however, receives no notice under Subsection D.2.a. of this Section within the time prescribed by that Subsection or no Trustee has an objection as provided under this Subsection D.3. within the time prescribed by this Subsection, the applicant will be exempt from the regulations of this Zoning Resolution.
