GEAUGA COUNTY, OHIO

A resolution providing for the zoning of the unincorporated area of CHESTER TOWNSHIP, Geauga County, Ohio, by regulating, in accordance with a comprehensive plan, the location, height, area, number and size of buildings and other structures, percentages of lot area which may be occupied, size of yards, courts and other open spaces, density of population, uses of buildings and other structures and the uses of land; and for such purposes dividing the unincorporated area of the township into districts and zones of such number, shape, and area as are deemed best suited to carry out said purposes, providing a method of administration, and prescribing penalties and proceedings for the administration and enforcement of this Resolution.

WHEREAS, the Board of Trustees of CHESTER TOWNSHIP deems it in the interest of the public health, safety, morals, comfort, convenience, prosperity and general welfare of said Township and its residents to establish a general plan of zoning.

NOW, THEREFORE, BE IT RESOLVED, by the Board of Trustees of Chester Township:

## SECTION 1 PURPOSE

### Section 1. PURPOSE

This Resolution is adopted in order to protect and promote the public health, safety, welfare, morals, comfort, convenience and prosperity. Specifically, the purposes of this Resolution are, among others:

- a. The protection of the community against fire, explosion, air pollution, vibration and other hazards to their health, safety, comfort or welfare.
- b. The prevention of vehicular traffic congestion on the streets by the appropriate classification of uses for each type of zoning district and the provision for off-street parking and loading facilities.
- c. To provide sufficient space in appropriate locations for the integrated development of residence, business and industry and those related uses supplying essential services, in accordance with a comprehensive plan, thus promoting the most desirable and appropriate use and development of all land in order to better stabilize the value of land and buildings and thus protect the tax base of the Township and the public health, safety, prosperity, comfort, convenience and welfare of said Township and its residents.
- d. Protect residential areas by limiting the density of population in order to avoid water pollution because of the difficulties in providing adequate sewage disposal and to protect the limited supply of water; by providing for access of light and air to windows and also for privacy, by means of controls over the spacing and relative height of buildings and other structures; and by providing for open space on the same lot with residential development.
- e. The prevention of overcrowding and blight of residential, commercial and industrial areas by regulating the area and height of buildings, yards and other open spaces in order to provide light, air and privacy and thus to protect the public health, safety, morals, comfort, convenience, prosperity and welfare.
- f. Secure the most appropriate use of land, to promote the beneficial development of all land, to promote stability, to protect the character and established pattern of desirable development in each area, to facilitate adequate but economical provision of public improvements, to conserve the value of buildings and to enhance the value of land; all in accordance with a comprehensive plan.

Section 4.57. GENERAL AREA REGULATIONS. Subject to the provisions of Section 2 and 4.56, the following regulations shall apply in an I District.

- a. The lot area shall be the area of any lot, or lots, comprising a development, excluding the right-of-way of an existing, or planned and duly approved future street, or planned street widening, and it shall be construed to encourage larger parcels for each development so as to provide space for expansion of main and accessory uses. If an industrial development of not less than twenty-five (25) acres is planned and submitted for approval as provided in Section 4.61, the lot areas set forth in Section 4.56 may be construed as average lot areas and up to twenty (20) percent of the lots may be less than the minimum lot area set forth, provided all other regulations are complied with.
- b. The lot width shall be the minimum distance any lot abuts a street line or the average width of any lot, whichever is less, and it shall be construed to encourage wider lots for each development.
- c. The lot coverage shall be the total ground floor area of all proposed and future buildings that cover any lot, and it shall be construed to encourage lower coverage initially so that the establishment may expand.

- d. The landscaped areas shall be that part of any lot which is not covered by buildings, parking areas, driveways or similar permitted outdoor use, and it shall be construed that it may be necessary to further increase the landscaped areas in providing the yards required under Sections 4.56, 4.58, or 4.59. The landscaped areas shall be developed and maintained as lawns along with trees and shrubs, or maintained in an orderly natural state.

Section 4.58. YARDS ADJOINING AN R DISTRICT\*, R2 DISTRICT<sup>2</sup>, R3A DISTRICT, RSA DISTRICT<sup>1</sup>. Where the boundary line of an I District adjoins the boundary line of an R District\*, R2 District<sup>2</sup>, R3A District, RSA District, the side or rear yard, as the case may be, shall be two hundred fifty (250) feet. No parking or paved area, roadway, lighting or other similar development shall be less than thirty (30) feet from any adjoining boundary of an R District\*, R2 District<sup>2</sup>, R3A District, RSA District, and no loading ramp shall be less than 100 feet from said boundary. A solid wall not exceeding six (6) feet in height or a strip of land at least ten (10) feet wide and densely planted with shrubs or trees which may be expected to form a year-round dense screen, shall be erected or planted and maintained along such boundary line. Such wall or planting shall be at least five (5) feet in height, except as provided in Section 4.59. All required screening shall be maintained in good condition at all times.  
\*(<sup>1</sup>Amend. Z-74-1, Effective date, 1-11-75. <sup>2</sup>Deleted: Amend. Z-75-4, Effective date, 2-21-76)

Section 4.59. CORNER SIGHT CLEARANCE. On every corner lot within the triangle formed by the street lines on such lot and a line drawn between two (2) points, each twenty (20) feet from the point of intersection of such street lines, there shall be no wall, planting or fence higher than three (3) feet, nor any other obstruction to vision between a height of three (3) feet and a height of ten (10) feet above the established grade of either street.

Section 4.60. PERFORMANCE STANDARDS. Every performance standard set forth herein, if deemed applicable by the Commission, shall be complied with as a condition to the issuance of a zoning certificate for any use in an I District and is subject to Section 7. The cost of studies needed to show compliance with any performance standard shall be borne by the individual, firm or corporation occupying the site at the time such studies are required by the Commission.

- a. Enclosure. All permitted main and accessory uses and operations shall be performed wholly within an enclosed building or buildings. All raw materials, finished products, mobile and other equipment shall be stored within buildings, with the exception that outdoor overnight parking of cargo carriers in the process of loading or unloading shall be permitted.
- b. Fire and Explosive Hazards. The storage, handling and use of flammable or explosive materials shall be permitted only in structures having incombustible exterior walls, and all

operations in connection therewith shall be provided with adequate safety and protective devices against hazards or fire and explosion as well as with adequate fire-fighting and suppression equipment and devices standard to the operation involved. The latest edition of the American Insurance Association "Fire Prevention Code" is hereby established as a guide in determining the adequacy of safety and protective devices.

- c. Waste Materials. No Discharge shall be permitted at any point, into any private sewage disposal system, or stream, or into the ground, of any materials in such a way or of such nature or temperature as can contaminate any water supply, or otherwise cause the emission of dangerous or objectionable elements, except in accord with standards approved by the Ohio State Department of Health, Geauga County Board of Health, Water Pollution Control Board, or, in the event that these agencies have not jurisdiction over the particular use involved, then standards equivalent to those approved by such agencies for similar uses shall apply. Solid wastes shall be stored in structures pending disposal and no accumulation of solid wastes conducive to the breeding of rodents or insects shall be permitted.

A separate storm sewer system, approved by applicable County and State agencies, shall be provided to receive storm water.

- d. Smoke. No emission shall be permitted at any point, from any chimney or otherwise, of visible grey smoke of a shade darker than No. 1 on the Ringelmann Smoke Chart as published by the U.S. Bureau of Mines (Power's Micro-Ringelmann Chart, McGraw-Hill Publishing Company, 1954, may be used), except that visible grey smoke of a shade not darker than No. 2 on said Chart may be emitted for not more than four (4) minutes in any thirty (30) minutes. These provisions, applicable to visible grey smoke, shall also apply to visible smoke of a different color but with an equivalent apparent opacity.
- e. Fly Ash, Dust, Fumes, Vapors, Gases and Other Forms of Air Pollution. No emission shall be permitted which can cause any damage to health, to animals or vegetation, or other forms of property, or which can cause any excessive soiling at any point, and in no event any emission, from any chimney or otherwise, of any solid or liquid particles in concentrations exceeding 0.3 grains per cubic foot of the conveying gas or air at any point. For measurement of the amount of particles in gases resulting from combustion, standard corrections shall be applied to a stack temperature of five hundred (500) degrees Fahrenheit and fifty (50) percent excess air.

- f. Noise. The sound pressure level of any operation on a lot, other than the operation of auto-calls, bells, motor vehicles, sirens or whistles, shall not exceed the average intensity of street traffic noise at the nearest residential lot line, and no sound shall be objectionable due to intermittence, beat frequency, or shrillness.
- g. Vibration. No vibration shall be permitted which is discernible to the human sense of feeling for three (3) minutes more duration in any one (1) hour of the day between the hours of 7 a.m. and 7 p.m. or thirty (30) seconds or more duration in any one hour between the hours of 7 p.m. and 7 a.m. No vibration at any time shall produce an acceleration of more than 0.1g or shall result in any combination of amplitudes and frequencies beyond the "safe" range of Table 7, U.S. Bureau of Mines Bulletin No. 442, "Seismic Effects of Quarry Blasting", on any structure. The methods and equations of said bulletin No. 442 shall be used to compute all values for the enforcement of this standard.
- h. Heat, Cold, Movement of Air or Dampness. No activities shall be permitted which shall produce any material effect on the temperature, motion, or humidity of the atmosphere at the lot line or beyond.
- i. Radioactive or Electrical Disturbance. No activities which emit dangerous radioactivity shall be permitted at any point. Radioactive or electrical disturbances shall not be created which would adversely affect any equipment at or beyond the boundaries of the lot occupied by the use.
- j. Odor. No emission of odorous gases or other odorous matter in such quantities as to be offensive at or beyond the boundaries of the lot occupied by the use shall be permitted. Any process which may involve the creation of emission of any odors shall be provided with a secondary safeguard system, so that control will be maintained if the primary safeguard system should fail. There is hereby established as a guide in determining such quantities of offensive odors Table 111 (Odor Thresholds) in Chapter 5, "Air Pollution Abatement Manual", copyright 1951 by Manufacturing Chemists' Association, Washington, D.C.
- k. Glare. No direct or sky-reflected glare, whether from floodlights or from high-temperature processes such as combustion or welding or otherwise, so as to create a public nuisance at or beyond the boundaries of the lot occupied by the use shall be permitted. All sources of illumination of the exterior of buildings or grounds shall be shielded so as not to cause glare which would be hazardous to auto drivers or would be objectionable to users of adjacent property.

Section 4.61. DEVELOPMENT PLANS. A preliminary and final Development Plan shall be prepared by the developer, or his agent, for all land development proposed in an I District and submitted to the Commission for review and approval in accordance with the following regulations.

- a. Plans for development shall be drawn at a scale no smaller than one hundred (100) feet to the inch and shall include:
  1. Survey: property and topography, showing land owned and proposed for development, surrounding streets and the adjoining lots.
  2. Buildings: locations, size, height and use of all proposed main and accessory buildings; the general design, materials and color; and the nearest buildings on adjoining lots.
  3. Traffic: proposed system of on-site vehicular circulation, details for access-ways to streets, methods for control of traffic and type of pavement.
  4. Parking Areas: layout and estimate of number of spaces, landscaping and other design features and type of pavement.
  5. Utilities: location, size and grade for all utility installations and connections to present or proposed facilities.
  6. Other Site Developments: including grading and drainage, design of landscaped yards, planting areas and buffers and adjoining residential areas; and the size, location and type of all outdoor signs and exterior lighting.
- b. Approval of Plans. The preliminary Development Plan shall be submitted to the Commission for study and review to determine whether the plan conforms with the provisions of the regulations set forth in this Section, or how it may be revised to conform therewith.
  1. If the preliminary Development Plan, together with any modifications thereof proposed by the developer, or his agent, is found by the Commission to be in accord with the requirements of this Section, it shall approve such preliminary Development Plan within two (2) months from the date of the meeting when all required plans and data were received; if not found to be in agreement therewith, the Commission shall recommend revisions to be made by the developer, or his agent.
  2. Upon approval of a preliminary Development Plan, the developer, or his agent, may prepare a final Development Plan and submit it to the Commission. If the

proposed final Development Plan is found to comply with and represents a detailed expansion of the preliminary Development Plan as previously approved and complies with any conditions which may have been imposed in the approval of the preliminary Development Plan, and complies with all applicable provisions of this Section, the final Development Plan shall be recommended to the Trustees within fifteen (15) days from the date of the meeting when all required plans and data were received for filing by the Commission. Within thirty (30) days of receiving the Commission's recommendation of the final Development Plan, the Trustees shall approve, disapprove or modify the final plan. The developer or his agent may then apply for a zoning certificate if the final Development Plan is found to comply with other applicable regulations of Chester Township, Geauga County and other applicable agencies.

- c. The final Development Plan may be revised by the developer, or his agent, and resubmitted through the same procedure required for the original preliminary and final Development Plan. Failure to begin the construction of all or a substantial portion of the improvements approved by the final Development Plan within one (1) year after the issuance of a Zoning Certificate shall make null and void the plan as approved unless an extension of time is granted by the Trustees.

## SECTION 5 NON-CONFORMING USES

Section 5. GENERAL APPLICATION. A non-conforming use of a non-conforming building or structure may be continued but a non-conforming use, building or structure shall not be enlarged or extended, nor shall any structural alteration be made to any such non-conforming building or other structure or to any building or structure in which such non-conforming use is conducted except as provided by this Section 5.

Section 5.1. CHANGE OF USE. A non-conforming use may be changed to any conforming use. A non-conforming use may be changed to another non-conforming use by special permission of the Board of Zoning Appeals. Such special permission may be granted only if the Board finds, after public hearing, that such changed use is of a more restricted nature than the existing non-conforming use.

Section 5.2. DISCONTINUANCE OF USE. If active and continuous operations of a non-conforming use are (1) discontinued for a continuous period of two (2) years, or (2) exchanged to or replaced by a conforming use, the building, other structure or land previously devoted to such non-conforming use shall thereafter be occupied and used only for a conforming use in accordance with all the use regulations of the district in which such building, other structure or lot is located. Intent to resume active operations shall not affect the foregoing.

Section 5.3. DAMAGE AND DESTRUCTION. The repair or replacement of a non-conforming use, building or structure that is damaged or destroyed shall be regulated as follows:

- a. If a building or structure occupied by a non-conforming use is damaged or destroyed by any cause, and the cost of repair or replacement exceeds fifty (50%) percent of the replacement cost of the building or structure on the date of such damage or destruction the right to maintain and operate such non-conforming use shall terminate immediately.
- b. If a non-conforming building or structure is damaged or destroyed by any cause, and the cost of repair or replacement exceeds seventy-five (75%) percent of the replacement cost of the non-conforming building or structure, the right to maintain such building or structure shall terminate immediately.
- c. If a non-conforming building or structure or a building or structure occupied by a non-conforming use becomes obsolete or substandard, as determined by any applicable provisions of the County Building Code, and the cost of bringing the

building or structure into conformity with such Code exceed fifty (50%) percent of the replacement cost of such building or structure on the date it is lawfully determined to be obsolete or substandard, the right to maintain and operate such non-conforming use shall terminate immediately.

- d. In determining the cost of repair or replacement of any building or structure, the zoning inspector shall not consider the cost of the land or any items other than the building or structure itself.
- e. The repair of such obsolete or substandard building or structure shall be completed within one (1) year of the date of the actual damage and destruction, or of the date such building or structure is lawfully determined to be obsolete or substandard.

Section 5.4. EXTENSION. The Board of Zoning Appeals may permit, after public hearing, the extension of the floor area or the land area of a non-conforming use or of a non-conforming building but not of any other non-conforming structure, to the amount not to exceed 10% of the floor area or land area presently in non-conforming use. Only one such extension shall be granted.

Before granting such permission the Board shall find that (a) such extended non-conforming use will not be more harmful or objectionable to the surrounding area, nor impair the orderly development of the Township and (b) the extension conforms to the area, yard and height regulations of the district in which it is located, and (c) the applicable off-street parking and the off-street loading requirements are complied with for the entire use and not only the extended portion.

Section 5.5. REPAIRS AND STRUCTURAL ALTERATIONS. Nothing in this Section shall be deemed to prevent normal maintenance and repair of a building or other structure containing a non-conforming use, or of a non-conforming building or structure.

Structural alterations may be made to a non-conforming building or structure or to a structure containing a non-conforming use as follows:

- a. When required by law.
- b. Pursuant to the provisions of Section 5.4.
- c. To convert to a conforming use.
- d. A building or other structure containing residential non-conforming uses may be so altered as to improve interior livability.

However, no structural alterations shall be made in excess of the area, height or yard regulations of the district in which such building is located.

Section 5.6. COMPLETION OF A NON-CONFORMING BUILDING OR STRUCTURE. When at the time of the passage of this Resolution, construction has begun on a non-conforming building or structure, such building or structure may be completed and used as contemplated at the time construction commenced, provided such construction is completed within one (1) year after the effective date of this Resolution.

SECTION 6

Section 6.1. OFF-STREET LOADING FOR NON-RESIDENTIAL BUILDINGS. For any non-residential building or structure hereafter erected with a ground floor area of more than five thousand (5,000) square feet, off-street loading space shall be provided in such amount and manner that all loading and unloading operations will be conducted entirely within the lot lines of the lot concerned. This Section shall not apply to agricultural buildings or structures.

Section 6.2. USE OF STREETS FOR LOADING PROHIBITED. No motor vehicle or conveyance shall in any manner use public streets, sidewalks rights-of-way, for loading or unloading operations, other than for ingress or egress to or from the lot.

RESOLUTION TO AMEND THE CHESTER TOWNSHIP ZONING RESOLUTION  
TO PROVIDE FOR SIGN REGULATIONS IN ALL DISTRICTS

WHEREAS, Chester Township is presently experiencing trouble in the interpretation and enforcement of current sign regulations as contained in the Zoning Resolution; and

WHEREAS, the Zoning Commission and Board of Township Trustees both consider it essential that reasonable regulations be enacted to control the use, location and size of signs in order to preserve protect and promote property values and appearance, and to accommodate legitimate advertising needs;

SECTION 1. Section 8 of the Chester Township Zoning Resolution entitles "Signs" is hereby enacted to read as follows:

8.1 Purposes

The section creates the legal framework for signage regulations that is intended to facilitate a lawfully acceptable communication between people. It recognizes the need to protect safety and welfare of the public, the need for well maintained and attractive appearance in the Township, and the need for adequate business identification and advertising and communication. This section recognizes that aesthetics and design quality cannot be satisfactorily legislated, as individual opinions vary and local public sentiment vary from one place and era to another. It is recognized, however, that a great percentage of that which is unattractive can be eliminated by sensible quality control, through adequate maintenance and inspection and by reasonable guidelines formulated to minimize clutter. This section intends to achieve the specific purposes to preserve, protect and promote property values and the community appearance, and to accommodate legitimate advertising and quality signage.

8.2 Definitions

As used in this section, certain terms are defined as follows:

- a. "Sign" means any device designed to inform or attract the attention of persons whether on or off the premises on which the sign is located.

## 8.2 Definitions (continued)

- e. "Sign face area" measurement or calculation shall include all sign frame appurtenances, supports or structural members above the average finished grade at the sign base. Only one (1) side of a double or multi-faced sign shall be used to calculate face area provided such sign faces are not joined at an angle greater than fifteen (15) degrees.
- f. "Roof sign" means any sign placed or attached by any means to the roof of the building.
- g. "Billboard" means a free-standing sign or wall sign exceeding 82.5 square feet of face area.

A temporary fence shall be constructed prior to commencement of drilling to prevent unauthorized access to drilling equipment and any excavations.

(F) During drilling of wells, casings shall be cemented to a minimum depth of 500 feet below the surface. The applicant shall insure that the cement provided shall be sufficiently adequate to case 500 feet of annular volume and shall fill the annular space entirely for a minimum depth of 500 feet. A record of the depth of the cemented casings shall be filled with the Zoning Inspector for the Township.

(G) The applicant shall provide the Zoning Inspector with a plat of all buried transmission lines. No person shall place any transmission lines within the Township without first obtaining a written easement therefor and recording the same with the Geauga County Recorder. Prior to opening any public street to bury transmission lines, the applicant shall comply with all County regulations and obtain any permits necessary by the County or the State. All buried transmission lines crossing any public street shall be marked by a permanent marker on both sides of the street, in a location and format acceptable to the Township Road Superintendent. At street crossings the line shall be installed to a minimum depth of six feet and to a minimum depth of thirty-six inches beneath ditches. All pipes being installed other than at street crossings shall be buried a minimum of twenty-four inches under the surface or twenty-four inches below a normal river or creek bed. All pipelines used to transport leasehold gas (used for the purpose of transporting gas from the leasehold facilities to points or places where said gas may be utilized on such premises) shall be buried a minimum of twenty-four inches under the surface, all connections to structures on the leasehold premises shall be in accordance with either the Regional Dwelling House Code or the Ohio Basic Building Code, whichever is applicable, and a plat indicating the location and depth of the pipe shall be given to the owner of such structure and a copy to the Zoning Inspector within fifteen days after connecting said pipeline to such structure. No transmission lines intended for burial across public streets shall be covered until the installed line is inspected by the Township Road Superintendent. When required by the Township Road Superintendent, the applicant shall increase or decrease the depth of transmission lines. The applicant shall coordinate the laying of transmission lines with all public utilities servicing the Township.

Section 8:4

During drilling and production of oil and gas wells, the applicant shall comply with the following regulations:

(A) During the drilling phase, all flowback and waste shall be accumulated in containers and no hydrocarbons, waste, water or other such elements shall be permitted to enter the atmosphere at the well site. Upon fracturing of any well, the applicant shall contain flowback entirely within an adequately vented enclosed system.

(B) All storage tanks shall be equipped with a hatch cover. The hatch cover shall be kept locked at all times in such a manner as to enable visual inspection of the tank when open. The oil storage tank shall be equipped with a vent pipe with a safety check valve. Oil storage tanks shall be no larger than that sufficient to contain and store 210 barrels of oil (each barrel capable of holding 42 U. S. gallons).

(C) In the event that any drilling or production of a gas and oil well causes any sour gas, or gas or oil odor deemed to be detrimental to inhabited structures and residents of the Township, as determined by the Township Zoning Inspector, the applicant shall take all necessary steps to eliminate escape of any sour gas and where ordered by the Township Zoning Inspector, shall provide a filter retrofitted on all storage tanks and shall insure during production of any well that said filters are either cleaned or replaced in order to adequately suppress odor. At least once each year, commencing at initial production of a well, the applicant shall test all safety valves used in the production of oil and gas to determine that they are properly functioning and shall report the same to the Zoning Inspector.

(D) The flow line from the well to the separator device shall have a pressure activated shutoff valve system to cut off the flow prior to the opening of the safety valve on the separator.

(E) A pump jack shall be equipped with an automatic shutdown system, to stop fluid spill if the rod packing leaks.

(F) All motor powered equipment intended for permanent use in production of wells or transmission of fluid or gas shall be operated only on electrical power. Any internal combustion engines being utilized during the drilling stage shall have adequate mufflers to suppress sound.

(G) All storage tanks, separators, and distribution pipes shall be surrounded by a minimum of one-inch clay seal on the surface of the ground and shall be contained by a retainer wall with a minimum one-inch clay seal capable of holding two times the capacity of all storage tanks. The applicant shall provide a loading area to the storage tanks with provisions for a ramp so that if any spillage occurs while removing any materials from storage tanks that any spill will go into a sump which can be pumped into a brine removal vehicle. The sump area shall be constructed by excavating a hole that shall be lined with clay and sufficient in size to contain a 55 gallon metal drum that shall be placed in the hole and said drum shall be weighted down with rocks, metal, or other materials in order to keep said drum submerged. Whenever the brine removal vehicle is at the loading area, all fluids in said sump shall be pumped into the brine removal vehicle. Applicant shall not permit the fluids in the sump to overflow at any time. Such areas shall be developed in accordance with Diagram "A", which is attached hereto and made a part hereof and the area of the pit shall be equal to or greater than two times the capacity of all storage tanks at the site.

(H) The maximum sound level of all operations for the exploration, drilling or extraction of oil, natural gas and other hydrocarbons shall be 65 decibels at a distance of 350 feet, to be exceeded no more than 10% of the time during drilling and exploration only. In the event that the Zoning Inspector determines that the decibel limit has been violated, such official shall order the applicant to cease production until adequate measures are taken to reduce the decibel level equal to or less than 65 decibels at a distance of 350 feet.

(I) Prior to drilling, the applicant shall transport steel pits to the site sufficient in size to contain all liquids produced as a result of anticipated drilling procedures. The steel pit shall have a capacity not to exceed 10,000 gallons. Whether or not said steel pits are buried in the ground or entirely on the surface, there shall be a minimum one-inch clay seal underneath said steel pit. During drilling, the drilling fluids, and other materials in said steel pits shall not be permitted to exceed a level of 18 inches from the top of said steel pit. No earthen pits shall be permitted for containment of drilling fluids or materials.

(J) Any liquid or waste, other than water used within the contained flowback process, extracted from a well during drilling or production shall not be re-injected into the ground within the Township. Annular disposal wells shall be prohibited within the Township and annular disposal of any waste or brine from an oil and gas well shall not be permitted within the Township. All such wastes and brines shall be stored in tanks and removed from the Township by haulers who shall be in compliance with any County, State, and Federal laws requiring registration, licensing or other regulations. When requested by Township officials, said hauler shall produce receipts for the location where such wastes or brine are injected.

Section 8:5

(A) During drilling of a well, the applicant shall install a blowout preventer with a remote manual preventer control, to shut down the system. All rotary rigs used in the drilling process must be equipped with a blowout preventer in good working condition of sufficient size and working pressure rating to control normal hydrostatic pressure for the deepest pool to be penetrated. Such blowout preventer must be installed on the surface casing prior to drilling below the surface casing. The applicant shall also install a gas detector meter to the drilling apparatus to determine if a gas pocket has been hit during drilling. The applicant or his agents shall insure that knowledgeable and experienced drillers shall be on site during all phases of drilling.

(B) The applicant, during production of a well, shall make daily fluid level checks of all oil, gas, brine, waste and other elements removed from any well and shall also check on a daily basis the condition of all equipment to ensure that all equipment required to be secured or locked is so secured. Any joint or connection under pressure and above ground which carries fluids or gases under pressure shall be inspected weekly to ensure no leakage. The applicant shall provide a monthly report to the Zoning Inspector of fluid levels indicated herein, the condition of all equipment, the pressure level of all equipment, leaks, if any, and advise the Zoning Inspector of efforts taken to avoid build-up of paraffin on any equipment or apparatus contained at a well site. The Zoning Inspector shall prepare an inspection form to be filled out monthly by the applicant and filed by the 5th of each month.

(C) After conclusion of the drilling stage, and upon the date when notice is required to be given to the Township of the commencement of production, the applicant shall remove all drilling equipment, temporary tanks and other materials not intended to be permanently placed at the well site.

(D) All disturbed areas are to be fine-graded, seeded, and mulched upon completion of drilling operations. Between November 1 and March 1, fine mulch only. Temporary mulch is to be removed in areas dressed, seeded and mulched after March 1. Weather permitting, all grading required herein shall be completed within 14 days after completion of drilling and all landscaping required herein shall be completed within 60 days after completion of drilling. In no event shall grading and landscaping required in this paragraph be completed in excess of 150 days after completion of drilling.

(E) All storage tanks, apparatus and other equipment located above ground at a well site shall be removed and abandonment completed within 180 days after a well stops producing and the ground shall be restored, to the extent possible, to its original condition prior to drilling of said well, within said 180 day period.

(F) The Township may, at any time, test the nearest water well, spring, and downstream surface water at locations selected by the Township to insure that no groundwater or surface water is being contaminated as a result of any oil and gas well operation. In the event that said testing determines that such contamination has occurred, the Zoning Inspector shall order the applicant to cease production until the source of contamination is located and the applicant is able to eliminate the source of contamination to the satisfaction of the Zoning Inspector.

The owner shall before beginning drilling operations test the water in every water well located within a radius of one-quarter mile from the location of the proposed oil and gas well location in order to obtain a base line quality of the water, unless the owner of the water well objects.

Section 8:6

(A) In the event an applicant at any time determines to cap a producing well, the applicant shall notify the Zoning Inspector. The applicant shall advise the Zoning Inspector of the length of time said well shall be capped and shall further notify the Zoning Inspector ten (10) days prior to when the well will again be made productive.

(B) The applicant shall not permit any hydrocarbons or brines to enter the Sharon or Berea Sandstone formations during drilling or production of any oil and gas well. In the event that such contamination of either sandstone shall occur, the applicant shall immediately notify the Zoning Inspector.

(C) During the drilling stage, no other improvement or additional use shall be placed on the drilling unit. Following initiation of production, such additional improvements and uses as may conform to the Zoning Resolution may be initiated on the drilling unit subject to the restrictions of all other applicable laws and regulations of the Township, County and State of Ohio. Unless other regulations require a greater distance, no new structure shall be located within 750 feet of any well site area within the drilling unit or any land outside of the drilling unit contiguous thereto and owned by applicant. No new subdivisions shall be developed to place a well site area in any common area nor be developed in such a manner that any well site would cause unreasonable sights, smells, odors, sounds, attractions to minors, or other detriments to the health and safety of the residents and natural resources contained within the Township. No structures or common areas are permitted to be developed in an area that may be unreasonably exposed to dangers associated with production, transmission or abandonment of oil and gas wells. The well site area shall be defined to include the oil and gas well, any storage or separation tanks, compressor station, or pit or containment areas for the storage of brine and other wastes.

(D) Applicant shall be prohibited from accumulating combustible materials in the well site area and upon order of the Township Zoning Inspector or Fire Inspector, shall remove any combustible materials that in the opinion of such Township official may be hazardous. Permanent no smoking signs shall be posted in the entrance gate, on the oil storage tanks and temporary signs shall be posted at the drilling site until production commences. No person shall smoke any cigarette, cigar, pipe or other form of tobacco or have any matches, open flames, or burn any other combustible material at the well site during drilling or when handling or removing gas at the well site. The applicant shall insure that when any welding occurs on the premises that suitable welding screens are utilized to protect any person from injury.

(E) All artificial lighting used during drilling or production of any gas and oil well shall be designed, constructed and located in such a manner to prevent emission upon any property not within the drilling unit.

(F) The applicant and any contractor shall be prohibited from increasing the porosity and permeability of the subsurface by the use of explosives.

(G) No person shall refine or otherwise process for extraction the products of a gas and oil well except when necessary to make gas acceptable to flow through gas transmission lines and in the event that the latter becomes necessary, the applicant shall notify the Zoning Inspector prior to commencement of such processing or production. Any burner unit installed in an oil storage tank shall be properly vented and attended to ensure no excess heating within the tank while in use.

(H) If during drilling, the site will be unattended at any time, the applicant shall cap the assembled sections of the well to avoid any hazard or leakage of hydrocarbons or wastes or other elements.

(I) All pipe and related fittings must be equal to or better than the American Petroleum Institute Code 5-L, Grade B, and consist of prime material with standard coating. Upon completion of construction of all tanks and other apparatus to remain on the well site and laying of pipelines, the applicant shall return all disturbed public or private roads, driveways, walks, or approaches to their original condition before disturbance to the satisfaction of the Township Road Superintendent. Applicant shall backfill to existing grade level in such a manner so as to prevent erosion or siltation and shall complete all of the same within 14 days after completion of the installation of storage tanks and other apparatus and pipelines.

(J) A hydrostatic test of all pipeline from the well to the separator and from the separator to transmission lines shall be performed by the applicant prior to placing said line or any section thereof into operation. The test shall consist of a pressure not less than two times the expected maximum operating pressure and shall be recorded over a minimum period of 48 hours. In the event that any drop of pressure is noted within said 48 hour period, the line shall not be made operational

until the line is capable of performing as set forth in this paragraph.

Section 8:7

(A) All gas produced from wells shall be transported from the drill site by means of underground pipeline connected directly with the producing well to the separator or treating facilities by a completely closed system without venting high pressure gas or the products of gas to the atmosphere at the production site. All oil produced from the wells on the well site may be transported from storage tanks by means of underground pipelines or by tank trucks whose holding capacity shall not exceed 100 barrels.

(B) All waste substances such as drilling muds, brine or acids produced or used in connection with drilling operations or production shall be retained in water-tight receptors from which they shall be hauled from the premises for disposal outside of Chester Township within ten days after the completion of drilling and no production shall commence until such removal has occurred.

(C) Truck routes in and out of the well site shall be approved by the Township Road Superintendent. The Superintendent shall require that truck routes through Township roads be limited to roads that can accept the load limits and shall consider routes that will minimize wear on public streets within the Township and which would prevent hazards and damage to other properties in the Township. When a vehicle exceeds load limits on Township roads, the driver shall post any bond which may be required and which is at the time of passage of this resolution \$10,000.00.

(D) The applicant shall be responsible for maintaining the public roads in a debris-free condition at all times and it shall be the responsibility of the applicant to cause the public roads to be free of all debris, mud and other materials that accumulate as a result of drilling, production, transmission, hauling or abandonment proceedings.

(E) The applicant shall provide one off-street parking space for each employee engaged in the drilling process and shall provide at least two permanent off-street parking spaces at the site where production equipment will be located. All trucks, machinery, drilling rigs and other equipment temporarily stored at the site shall be kept within a temporary fenced-in area around the well site when not in use.

Section 8:8

Applicant shall at all times maintain, repair, repaint and replace any storage tank on the drilling unit and shall adequately maintain, repair and replace all fences required under the Zoning Resolution. In the event that the applicant fails to maintain, repair or replace any fence, tank dike, or other structure or apparatus contained on the drilling unit for the purpose of oil and gas well drilling, production or transmission, the same shall be a violation of this Zoning Resolution and the Zoning

Inspector may order the applicant to shut down and cap any producing well or seek any remedies otherwise provided in this Zoning Resolution.  
(See Section 7.7 b. Prohibition Against Violation of Zoning Resolution)

Section 8:9

(A) In the event an oversized or overweight vehicle is used or is to enter the Township and exceeds the classifications set for load limits on streets and roads within the Township, the applicant and vehicle owner, if different than applicant, shall obtain a special permit for overweight vehicles and enter into an agreement to pay for road repairs in accordance with the terms and conditions set forth in the special permit and agreement as more fully set forth in Exhibits B and attached hereto and made a part hereof as if fully rewritten herein, unless the Board of Trustees deems it necessary to provide additional regulations.

(B) In the event that the Zoning Inspector determines that site preparation, drilling operations, or fracturing operations become hazardous, or may cause damage to surrounding properties due to either adverse weather conditions, geologic conditions, or other conditions which become known to said officials, and said drilling or fracturing will adversely affect the health and safety of the residents of the Township, the applicant shall cease drilling or fracturing operations upon oral or written notice from such officials and shall not commence further operations until said hazard or adverse effect on health and safety can be eliminated
